

Pyongyang, October 2 (KCNA) -- The emergency anti-epidemic units at all levels are directing great efforts to taking measures for thoroughly checking the inroads of COVID-19 in a scientific way.

The central emergency anti-epidemic agency is applying scientific methods to laying an anti-virus barrier. It works hard to establish a stricter control and guidance system to ensure that utmost vigilance is maintained by every unit in its emergency anti-epidemic work without a moment's indolence, slackness, self-complacency and carelessness.

It is pushing ahead with the development and production of highly efficacious disinfectant and with the study and application of effective sterilizing methods for scientifically ensuring the anti-epidemic work in close contact with education and scientific research institutions.

The emergency anti-epidemic units across the country are introducing into preventing COVID-19 the methods suiting the local natural, geographical, social and economic conditions.

In the areas along borders, coasts and the demarcation line, strict anti-epidemic measures have been taken to firmly consolidate the anti-virus barrier and citizens are urged to voluntarily observe the rules of conduct.

The units handling imports are carrying out disinfection in a responsible manner while making preparations for introducing new sterilizing methods and equipment.

In the areas where the campaign for recovery from damage by natural disasters is underway, anti-epidemic workers are urged to fulfill their role. Officials of the units involved in recovery project pay primary attention to the anti-epidemic work as well as the recovery project after establishing a scientific examination and disinfection system to thoroughly check the inroads of the malignant virus.

All the citizens across the country are strongly urged to disinfect their hands and wear masks as specified in the rules, keep their working places and living environments neat and tidy in terms of hygiene and culture and strictly observe the anti-epidemic rules in restaurants, shops and public traffic means. -0-
